Dear Valued Distributor/Customer,

Advantage is pleased to announce that our liquid dishmachine detergents are receiving a formula upgrade. As you may know, HTD power has been discontinued, and we will now only carry LTD and ATD Power formulas. To ensure that these products deliver a consistent quality, we have increased the active concentration to deliver consistent, superior cleaning. ATD Power will serve as an all water conditions detergent, delivering superior results in a variety of water conditions, and replace the current "4X" product. Please visit our website for a revised SDS, or contact your account manager.

All changes will be effective October 1st, 2016. For any questions on this transition, please reach out to Ray Ibarra, Product Developer, at 855.238.2436 or ribarra@advantagechemical.com.

Features and Benefits

- Free rinsing formula
- Ultra-concentrated
- Exceptional soil cutting
- Phosphate free
- Low foaming
- Biodegradable
